12. Domain: Language Technologies

Sr. No.	Parameters	Brief details
1.	**Brief details of Technology Developed**	The **Localization Project Management Framework (LPMF)** is a structured, end-to-end framework designed to manage, implement, monitor, and sustain localization activities for multilingual digital Website. **Website Translation**: LPMF is used to translate websites dynamically, allowing users to switch languages with a single click. **Crowdsourcing:** The framework facilitates community and translator participation in the localization process, allowing for contributions and updates to translations. **Integrated Tools:** It integrates various tools to aid translation, including Machine Translation (MT) systems, virtual keyboards.
	Name of the Project under which technology is developed	Localization Project Management Framework (LPMF)
	Funding Agency	MeitY
	Technology Readiness Level (TRL)	TRL-9 We deployed this product on several of client location and some solutions are running from our infra. https://www.localisation.gov.in/index.php/success-stories.html
	Brief Write-up on the Technology Developed	LPMF Framework is a centralized system developed by C-DAC for community participation in localization process. It can be used to translate website(s) dynamically / on the fly just by the click of a button. It enables crowd and translators to contribute and update the translations. In order to translate/post-edit, various Machine Translation (MT) systems are also integrated to aid the crowd and translators. It is provided with virtual keyboard to edit or contribute to a new translation.
	Details of Contact Person along with Mobile No. and e-mail ID	Mr. Vainateya Koratkar Mob:9371206997 vainateya@cdac.in
2.	**Brief details of Technology Developed**	• A multi-domain text-to-text machine translation system in synchrony with speech consortia to facilitate bidirectional translation between: Hindi - Bengali, Konkani, Maithili, and Marathi. • Creation of linguistic resources • Development of benchmark data for each pair Deployment of the MT system for the stakeholders
	Name of the Project under which technology is developed	English to Indian language [Hindi, Marathi, Gujarati, Odia, Kannada & Malayalam] and vice versa Machine Translation system. Also, another system for Indian languages to Indian languages is also developed.
	Funding Agency	MeitY
	Technology Readiness Level (TRL)	TRL 8
	Brief Write-up on the Technology Developed	Machine Translation System will be deployed as a service from English to Hindi, Marathi, Gujarati, Odia, Kannada and Malayalam languages and vice versa on Bhashini's platform. To create and nurture an ecosystem involving Central/State Government institutions to work together to develop and deploy innovative products and services in Indian Languages

Sr. No.	Parameters	Brief details
		The system will support translation needs in public services, textbooks and educational materials, tourism-related information, and legal documentation, helping improve access to information in Indian languages. The MT services will be available through mobile applications, web services, and APIs, and released as open-source for wider community use and innovation. A defined evaluation framework and metrics will ensure systematic performance assessment and benchmarking.
	Details of Contact Person along with Mobile No. and e-mail ID	Ms. Lenali Singh, C-DAC, Pune, 9890015404, lenali@cdac.in
3.	**Brief details of Technology Developed**	English to Kannada and Kannada to English Machine translation system
	Name of the Project under which technology is developed	English to Indian language Machine translation system
	Funding Agency	MeitY
	Technology Readiness Level (TRL)	TRL – 7
	Brief Write-up on the Technology Developed	English to Kannada and Kannada to English Machine translation is Neural Machine Translation system developed under English to Indian Language Machine translation system project funded by MeitY. In-house developed corpus and available open-source corpus is being used to train NMT system.
