Varnika Keyboard

Test Report (Version 1.0)

Revision History

Sr. No.	Date	Test Report Version	Remarks
1.	08/09/2025	1.0	Varnika Keyboard (Beta Version 1.0.0) Test Report (Duration: - From 03 September 2025 to 08 September 2025)

System Access Details

- Varnika Keyboard (Beta Version 1.0.0)
- URL : https://gistlangserver.in/varnikakeyboard/demonstration
- Desktop - Test Environment:
  - Windows 11, Microsoft Edge: Version 139.0.3405.125 (Official build) (64-bit)
  - Windows 10 (64 bit), Google Chrome Version 140.0.7339.81 (Official Build) (64-bit)
  - Windows 10 (64 Bit), Mozilla Firfox 142.0.1 (64 Bit)
- Mobile - Test Environment:
  - Android 15 Chrome version: 140.0.7339.51
  - Android 12, Microsoft Edge: Version 139.0.3405.125
  - Android 14, Chrome version: 139.0.7258.158
  - Mobile Galaxy S24 (One UI Version 7.0+Android 15) + Mozilla Firefox 142.0.1 (Build #2016110943)
- Test Duration: - From 03 September 2025 to 08 September 2025

  Completed first test iteration of Varnika keyboard

- Scope: Functionality Testing

Issues

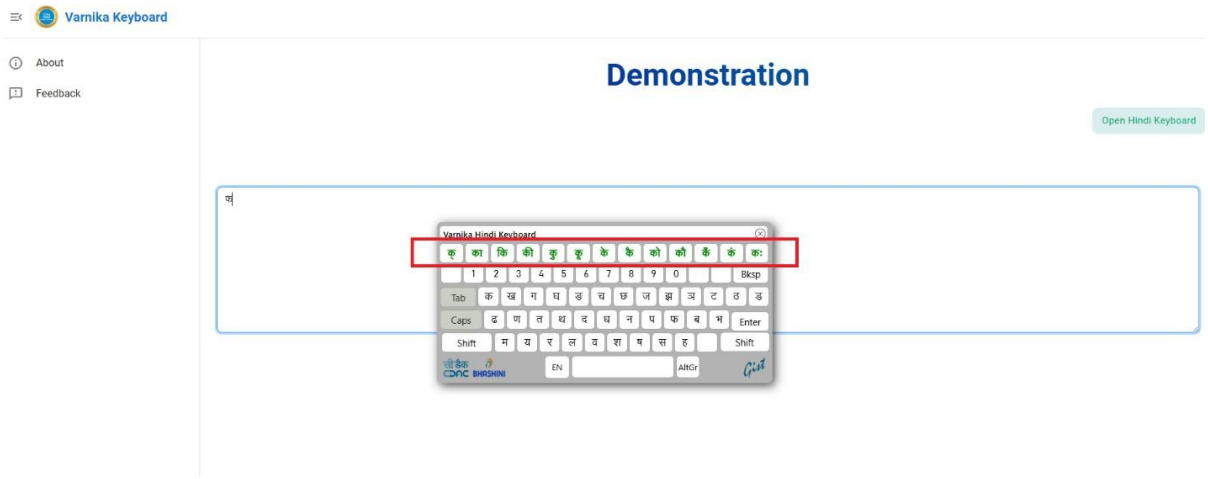

1. There is no use of Barakhadi layer when typing using physical keyboard.

Summary: There is no use of Barakhadi when typing using physical keyboard.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. Type any consonant.
4. You can see Barakhadi of that consonant, but this Barakhadi cannot be typed using physical keyboard.

Proof of Concept:

Developers Remarks:
The physical keyboard doesn't have keys to map the Barakhadi layer typing.

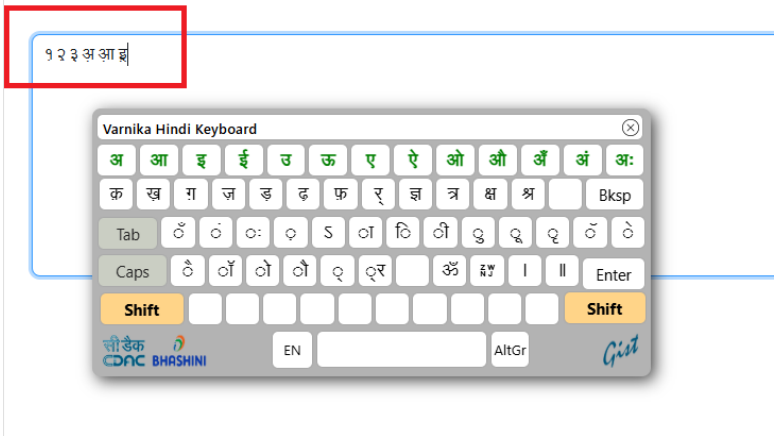

2. Nukta getting added to numbers and Vowels.

Summary: Nukta getting added to numbers and Vowels.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. Type any number or vowel and then Nukta.
4. You can see Nukta is getting added to numbers and vowels.

Proof of Concept:

Developers Remarks:
This cannot be fixed since we don't have control over the user's typing. Other keyboards in the market exhibit the same behaviour.

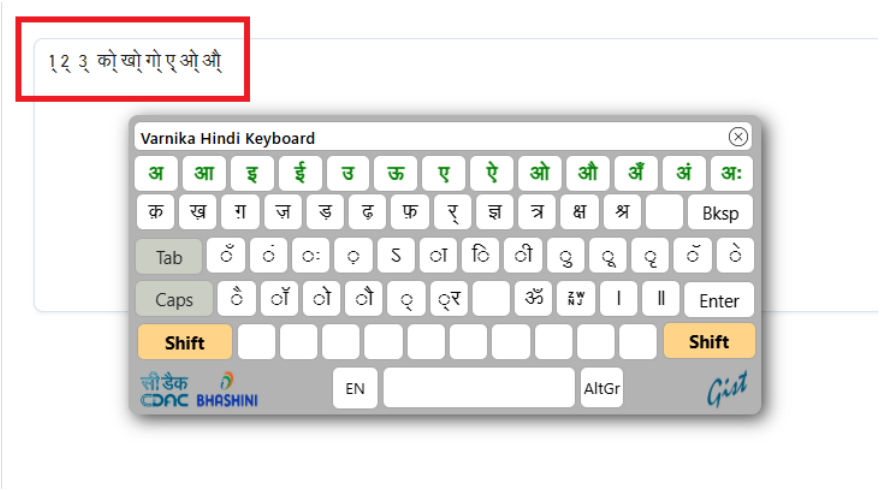

3. Halant getting added to numbers, vowels and consonants + Matra.

Summary: Halant getting added to numbers, vowels and consonants + matra.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. Type any number, vowel or consonant + Matra and then Halant.
4. You can see Halant is getting added to numbers, vowels and consonants + Matra.

Proof of Concept:

Developers Remarks:
This cannot be fixed since we don't have control over the user's typing. Other keyboards in the market exhibit the same behavior.

4. Instead of halant+Ra, key should display Rakar.

Summary: Instead of halant+Ra, key should display Rakar.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. Press Shift.
4. You can see halant+Ra, there should be just Rakar.

Proof of Concept:

Developers Remarks:
This is a font issue. We will request the font team to improve it.

5. The URL https://gistlangserver.in/varnikakeyboard/demonstration not opening properly on mobile Galaxy S24 (One UI Version 7.0+Android 15) + Google chrome 139.0.7258.158.

Summary: The URL https://gistlangserver.in/varnikakeyboard/demonstration not opening properly on mobile Galaxy S24 (One UI Version 7.0+Android 15) + Google chrome 139.0.7258.158.

Steps to Generate Issue:

1. Open https://gistlangserver.in/varnikakeyboard/demonstration in Google chrome (version 139.0.7258.158) on Galaxy S24 (One UI Version 7.0+Android 15).
2. The link is not opening properly, only Accessibility toolbox is opening.

Proof of Concept:

Developers Remarks:
It could be due to slow mobile internet. To verify it on our end, we would need the same mobile device.

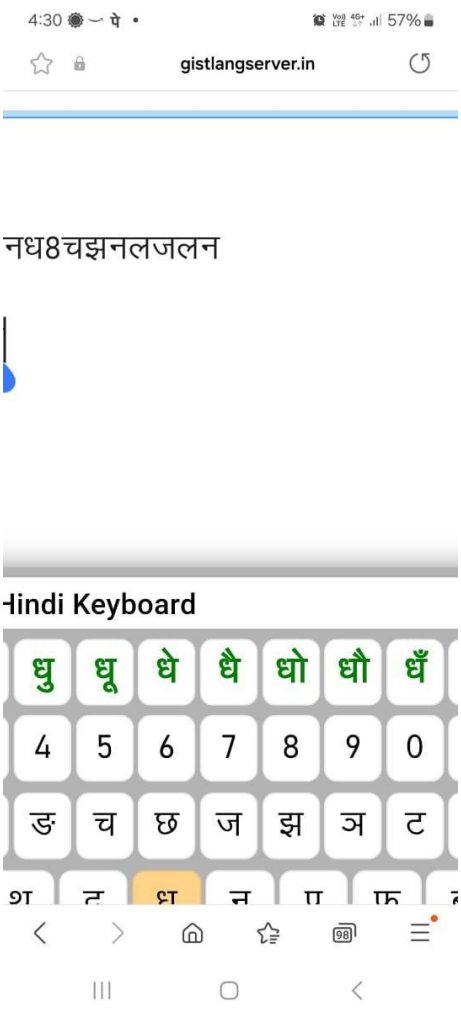

6. The application does not work properly when zoomed in.

Summary: The application does not work properly when zoomed in.

Steps to Generate Issue:

1. Open https://gistlangserver.in/varnikakeyboard/demonstration in mobile browser.
2. Click on “Open Hindi Keyboard”.
3. Type some hindi text in text area.
4. Zoom in the page and scroll down to keyboard.
5. In text area user is not able to scroll and keyboard is not properly visible.

Proof of Concept:

Developers Remarks:
A native keyboard is built into the device's operating system, so it doesn't zoom when the browser is zoomed. However, our keyboard is web-based and rendered within the browser, so it will zoom when the browser is zoomed.

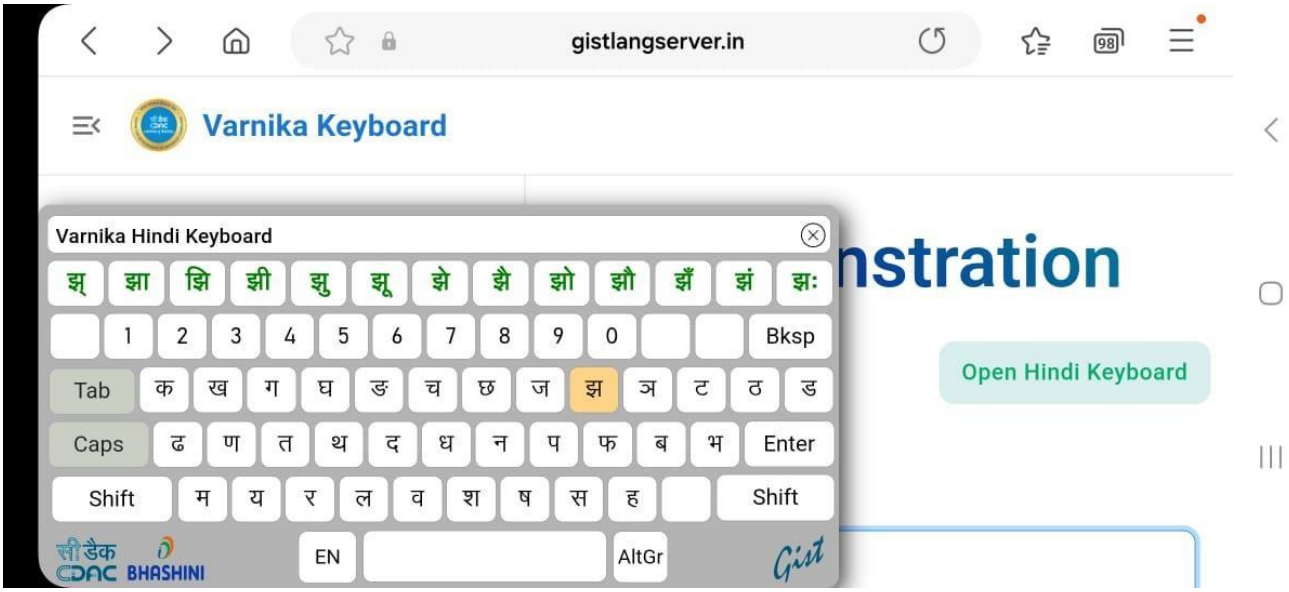

7. Keyboard Overlaps Text Area in Horizontal (Landscape) Mode on Mobile.

Summary: After rotating the mobile device to horizontal (landscape) orientation, the Varnika keyboard overlaps the text area, preventing typing. Additionally, the keyboard cannot be moved or adjusted.

Steps to Generate Issue:

1. Open https://gistlangserver.in/varnikakeyboard/demonstration in mobile browser.
2. Click on “Open Hindi Keyboard”.
3. Turn the mobile screen in horizontal (Landscape) mode.
4. Now, the keyboard overlaps the text area, preventing typing. Additionally, the keyboard cannot be moved or adjusted.

Proof of Concept:

Developers Remarks:
We will need some time to resolve the issue.

8. On Galaxy S24 (One UI 7.0, Android 15) using Mozilla Firefox version 142.0.1 (Build #2016110943), the keyboard is misaligned; it is cut off and does not fit properly within the mobile screen frame.

Summary: On Galaxy S24 (One UI 7.0, Android 15) using Mozilla Firefox version 142.0.1 (Build #2016110943), the keyboard is misaligned; it is cut off and does not fit properly within the mobile screen frame.

Steps to Generate Issue:

1. Open https://gistlangserver.in/varnikakeyboard/demonstration in Mozilla Firefox (Build #2016110943) on Galaxy S24 (One UI Version 7.0+Android 15).
2. Click on “Open Hindi Keyboard”.
3. The keyboard does not fit properly within the mobile screen frame.

Proof of Concept:

Developers Remarks:
We will need some time to resolve the issue.

9. Number of logos mismatch in keyboard visible on desktop and keyboard visible on mobile.

Summary: Number of logos mismatch in keyboard visible on desktop and keyboard visible on mobile.

Steps to Generate Issue:

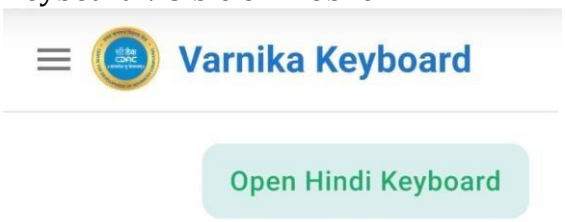

1. Open https://gistlangserver.in/varnikakeyboard/demonstration in mobile and desktop browser.
2. You can see the Number of logos mismatch in keyboard visible on desktop and keyboard visible on mobile along with its position.

Proof of Concept:

Keyboard visible on Desktop

Keyboard visible on mobile

Developers Remarks:
Due to limited space on mobile screens, we are only adding the company logo instead of the group logo on the keyboard.

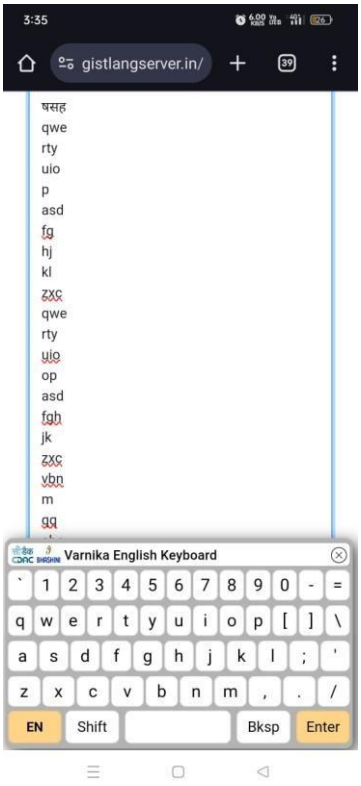

10. Text typed is hide behind the onscreen keyboard after typing large text in text area.

Summary: Text typed is hide behind the onscreen keyboard after typing large text in text area.

Steps to Generate Issue:

1. Open https://gistlangserver.in/varnikakeyboard/demonstration in mobile and desktop browser.
2. Click on “Open Hindi Keyboard”.
3. Type multiple lines until text area is full. Scroll vertically in text area.
4. When continuing to type, the newly entered words are hidden behind the on-screen keyboard.
5. To view the newly typed words, the on-screen keyboard needs to be closed.

Proof of Concept:

Developers Remarks:
We will need some time to resolve the issue.

11. Remove GIST logo.

Summary: Remove GIST logo.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. You can see GIST logo is present.

Proof of Concept:

Developers Remarks:
Resolved

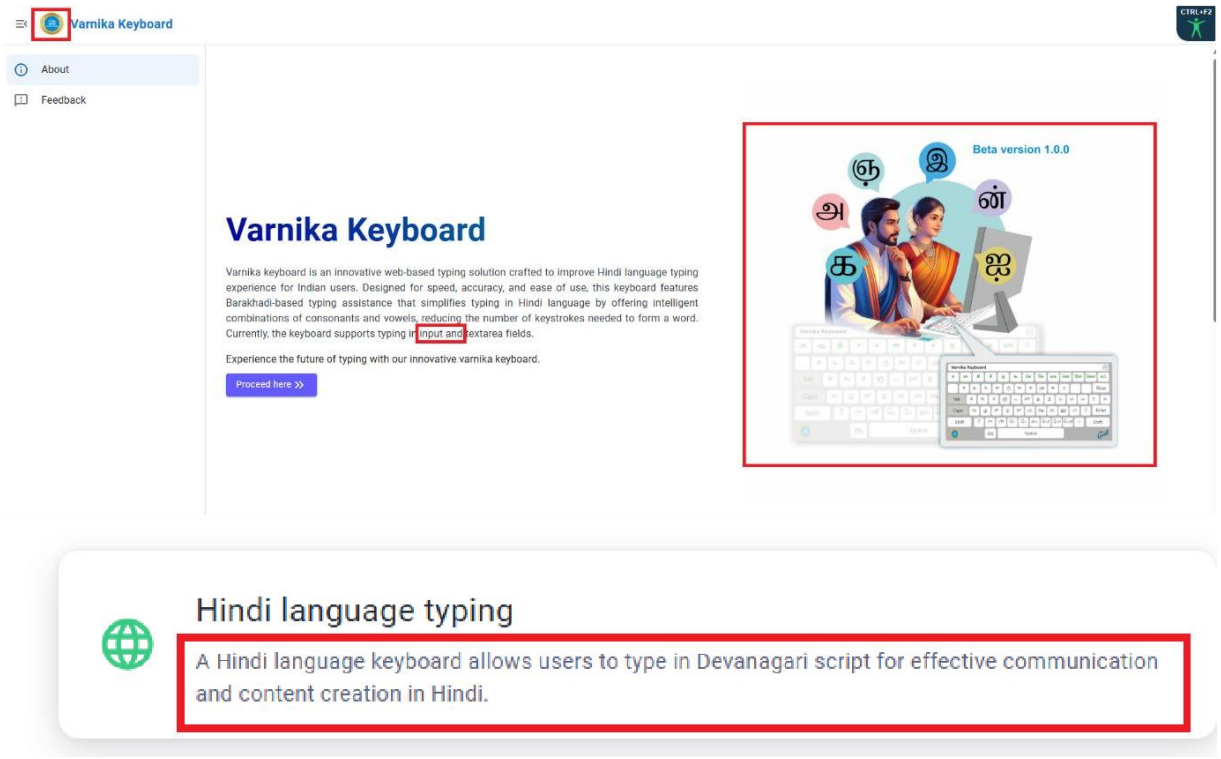

12. About page information is not updated.

Summary: About page information is not updated.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/
2. The image on right hand side conveys Tamil information although the keyboard is for Hindi typing.
3. Old C-DAC logo is present.
4. Description under “Hindi Language Typing” section needs to modify.

Proof of Concept:

Developers Remarks:
Resolved

13. No typing is possible with a physical keyboard when Shift is pressed followed by AltGr.

Summary: No typing is possible with a physical keyboard when Shift is pressed followed by AltGr.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. First press Shift and then AltGr on physical keyboard.
4. After pressing shift and AltGr, no character is getting typed by physical keyboard.

Proof of Concept:

Developers Remarks:
Resolved

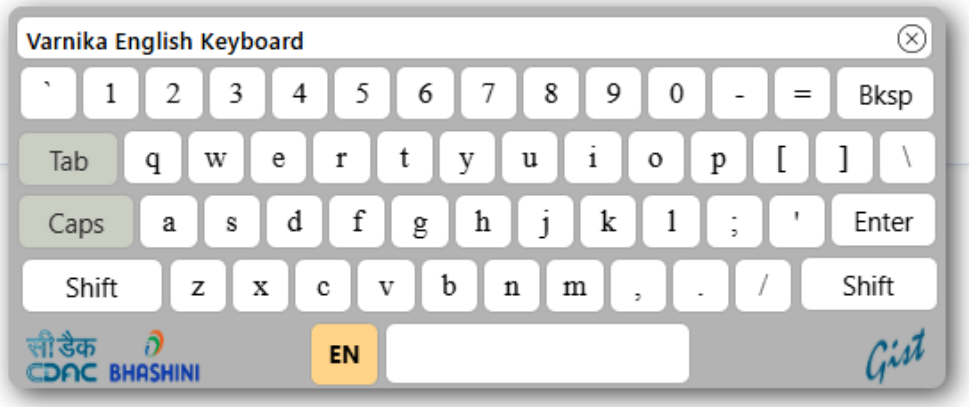

14. No option is provided to type the Rupee symbol (₹) in English keyboard.

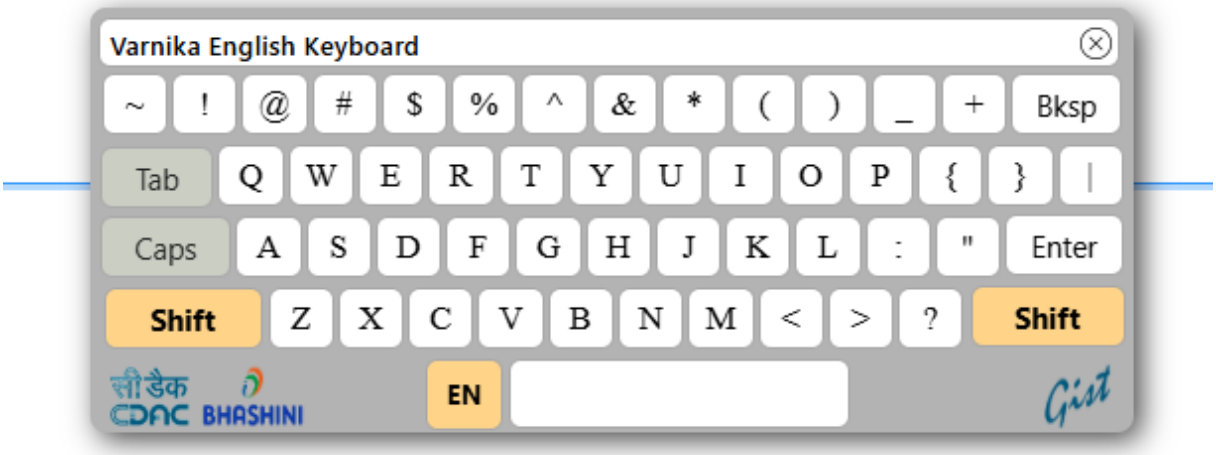

Summary: No option is provided to type the Rupee symbol (₹) symbol in English keyboard.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. Press “EN”
4. You can see there is no Rupee symbol on English keyboard.

Proof of Concept:

Developers Remarks:
Resolved: We have added it in Altgr layer in English keyboard

15. Ra Halant (reph) are getting applied to vowels.

Summary: Ra Halant (reph) are getting applied to vowels.

Steps to Generate Issue:

1. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
2. Click on “Open Hindi Keyboard”.
3. Press Ra Halant and then vowel.
4. You can see the rafar getting added to vowel which should not happen.

Proof of Concept:

Developers Remarks:
This cannot be fixed since we don't have control over the user's typing. Other keyboards in the market exhibit the same behavior.

16. Vishisht Vynajan 'ळ' is not provided on keyboard.

Summary: Vishisht Vynajan 'ळ' is not provided on keyboard.

Steps to Generate Issue:

1. Open Chrome browser on android.
2. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
3. Click on open Hindi Keyboard.
4. 'ळ' is not present on keyboard though it is mentioned in hindi vartanika mankikaran.

Developers Remarks:
We have removed it as it is mentioned in IS16333 document.

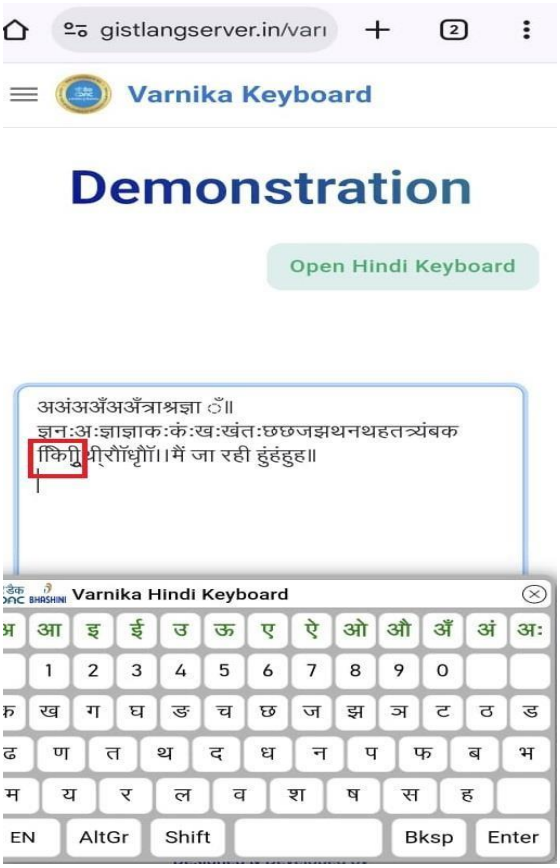

17. Multiple matras getting added to characters.

Summary: Multiple matras getting added to characters.

Steps to Generate Issue:

1. Open Chrome browser on android.
2. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
3. Click on open Hindi Keyboard.
4. Press any character like 'क' then apply matras, you can see multiple matras getting added.

Proof of Concept:

Developers Remarks:

This cannot be fixed since we don't have control over the user's typing. Other keyboards in the market exhibit the same behavior.

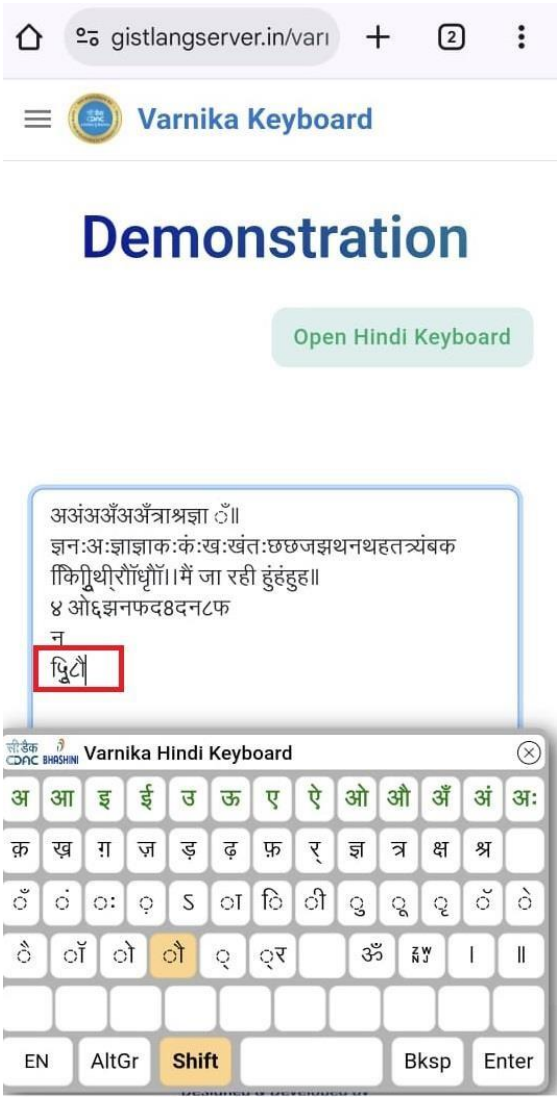

18. Matras are getting added to digits.

Summary: Matras are getting added to digits.

Steps to Generate Issue:

1. Open Chrome browser on android.
2. Go to link https://gistlangserver.in/varnikakeyboard/demonstration
3. Click on open Hindi Keyboard.
4. Type any digit, now activate shift layer and choose any standalone matra from here, upon applying it, the matra being applied with digit, which shouldn't happen.

Proof of Concept:

Developers Remarks:

This cannot be fixed since we don't have control over the user's typing. Other keyboards in the market exhibit the same behavior.
